. . or it could be an amazing performance or anything in between. Either way, it's all here on Coub for you to enjoy. Coub is compatible with YouTube, Vimeo, DailyMotion, Vevo, Gaana and Vudu. Unlike other video creation platforms, Coub allows you to save your files for future reference. The best part is, you can also share your files with other Coub users. As of 2017, Coub is available for iOS, Android, Windows and web browsers. You can download the app from the iOS or Android app store. If you have any problems or suggestions, just reach out to us. Coub is all about videos. That's the reason we have created this app. Coub offers a simple, yet powerful and intuitive way to create your own videos. But the best part is, you don't need any video editing skills to do so. With Coub, all you need is your imagination and your creativity. Coub allows you to trim videos, add soundtracks, split videos, combine videos, and add a fade-in or fade-out. All of this is possible with the simple and

straightforward interface. With Coub, you can create videos in a matter of minutes. All of your files are saved on Google Drive. You can choose to share your videos with others. If you are not happy with your creations, you can always delete them. Coub is all about videos, so it comes as no surprise that it is compatible with a wide range of platforms. You can create your videos using YouTube, Vimeo, DailyMotion, Vevo, Gaana and Vudu. The apps are all native apps, so you don't have to download any plugins. Once you have created a video using Coub, you can share it with your friends. Coub is also available on iOS and Android. If you have any issues or feedback, feel free to reach out to us. Coub allows you to trim videos, add soundtracks, split
